Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being taught by Kozlov, V. A. et al., All-fiber coherent beam combining of fiber lasers, Optics Letters, December 15, 1999, Vol. 24, No. 24, pages 1814 to 1816.

As to claim 1, Kozlov et al. teaches a fiber laser unit comprising a plurality of fiber lasers that generate laser beams by exciting a laser active substance inside cores by exciting light, propagate the laser beams inside the cores and output from the ends thereof, wherein each of the fiber lasers has a resonator structure that reflects a laser beam on both ends, and the cores of the fiber lasers are made proximal to each other at a part, and by using a laser beam outputted from the inside of the core of an arbitrary fiber laser, injection synchronization is carried out inside resonators of other fiber lasers [second paragraph].

As to claim 2, Kozlov et al. teaches each of the fiber lasers has a structure in which a part of the cores is reduced in diameter, and the cores are made proximal to each other at the core diameter reduced portion [figure 3 (a)].

As to claim 3, Kozlov et al. teaches the diameter reduced portion and the proximity portion are formed by an optical fiber coupler [figure 3's explanation].

Application/Control Number: 10/518,234

Art Unit: 2828

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kozlov et al. as applied to claims 1-3 above, and further in view of Shirakawa et al., "Coherent addition of Fiber lasers by use of a fiber coupler," Optics Express, Optical Society of America, Vol. 10, No. 21, October 21, 2002, pp. 1167-1172.

Kozlov et al. teaches all of the characteristic features of the present invention as recited above.

However Kozlov et al. fails to disclose among the plurality of fiber lasers, a loss is applied to ports of the fiber lasers except for one fiber laser.

Shirakawa et al. teaches among the plurality of fiber lasers, a loss is applied to ports of the fiber lasers except for one fiber laser [page 1171].

It would have been obvious to one of ordinary skill in the art to modify the apparatus disclosed by Kozlov et al. by incorporating the feature disclosed by Shirakawa et al.

One would have been motivated to make this modification in order to increase the addition efficiency as implied by Shirakawa et al. [page 1171].

Application/Control Number: 10/518,234 Page 4

Art Unit: 2828

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kelly A. Rogers whose telephone number is 571-272-8047. The examiner can normally be reached on Monday through Friday 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minsun Harvey can be reached on 571-272-1835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
